

Get started with DAX Copilot

Start taking smarter, faster encounter notes.

Documenting encounters with DAX Copilot makes note-taking easier, plain and simple. But don't take our word for it— Ask any of your colleagues who are already using DAX Copilot to handle detailed clinical documentation while caring for their patients.

Getting started is easy, and it doesn't break your flow— you can quickly integrate DAX "Smart Sections" into your existing personalized Epic SmartPhrase note templates.

DAX Copilot learns from you, which means the amount of time you spend reviewing the documentation it generates typically goes down over time. And the time you save is significant: **Providence physicians and APPs report spending 60% less time on the exam room computer and 57% less time on documentation as a whole!**

Need extra help? We've got you.

Join a user group meeting, a new user orientation session, find additional resources and more on the DAX Sharepoint site. We can't wait to hear what you do with the extra time in your day!
